

DON'T LET FASTENER COATINGS GET THE BEST OF YOU.

Huge liabilities can result from failure to QC outsourced fastener coatings. Damage to the distributors' reputation as well as potential losses can result from improper QC of fasteners, including the finish. Protect yourself and check behind your outsourced finishers with a cost effective, ASTM-B117 salt spray test.

Florida, USA - failure of coating after 6 months

CORROSION & SALT FOG TESTING

Salt Spray Testing provides a controlled accelerated corrosive environment to evaluate the relative corrosion resistance of the coating or part itself. Parts or panels are placed inside a chamber and exposed continually for a specified period then evaluated for resistance to rust.

Industrial Rivet maintains multiple 22 cubic foot cabinets conforming to ASTM B117 continuously. Parts of various sizes can be accommodated in the chamber. Parts often go into the cabinet the same day received. Upon test completion, parts are evaluated and test reports generated quickly.

Corrosion testing helps you estimate component service life, compare candidate materials in your service environment, and help screen your materials and their condition.

We employ Singleton® Salt Fog Chambers, Model SCCH-22

PRICE LIST

This is where you list what your current event prices are.

SST-T1, Salt Spray Testing (per hour) \$0.85 /hour
\$95 minimum

10 pcs - standard, start/stop, salt spray testing per ASTM-b117. Test Start to Test End, or Test Start to failure. Size and part configuration can affect the price. Includes a final report upon test completion. Test Results are recorded Monday thru Saturday, except holidays.

SST-P1, Digital Photo \$2.50 ea.

Digital Photo taken, daily, weekly, or at end of the test. Photo can also be taken at first sign of white and/or red rust. Price is per each photo.

SST-P2, Digital Photo Set \$20.00

Digital group of Photo's taken, daily, weekly, or at end of the test. Photo's indicate points of coating failure and type of failure. Includes photo's of fixturing devices.

SST-T2, Final Inspection Report N/C

Detailed A2LA compliant Final inspection report. If photo's are required, then the digital photo charge applies. Photo's are only charged once.

SST-T3, In-process Inspection Report \$20.00

Report daily, weekly or at any time during the test. If photo's are required, then the digital photo charge applies. Photo's are only charged once.

SST-T4, Lab Certificate N/C

Certificate of laboratory compliance to A2LA, ASTM, ISO test / certification standards

SST-T5, NIST Traceability detail \$50.00

A report detailing the lab equipment and all NIST traceable calibration records.
